

Aluminum vs. Brass Valve

FIRE EXTINGUISHERS

“COMPLIANCE” EXTINGUISHERS are designed to meet and exceed state or local fire protection requirements. “Specialty” extinguishers are intended for use on particular types of hazards. Careful attention should be paid to locating them near the specific hazard they are meant to protect. It is natural for a person to use the extinguisher located nearest to a fire. The most current edition of *NFPA 10* should be consulted for fire extinguisher selection, location, installation, and maintenance procedures.

A SPECIFIC HAZARD ANALYSIS should be conducted by an authorized Amerex Distributor to determine the exact extinguisher that is needed. Below is a general application guide.

ALUMINUM VALVE

- Healthcare
- Light Industrial
- Medium Industrial
- Education Buildings
- Commercial Office Spaces

BRASS VALVE

- Heavy Industrial
- Distribution Centers
- Oil and Gas
- Mining Operations
- Coastal Areas
- Dusty Environments
- Agriculture
- Waste Management
- Transportation
