

Our products aren't always obvious,  
but the reasons for selecting them are.

Quality is Behind the Diamond.

The attraction of a diamond can't be fully explained by its flawlessness. The long odds against its ever being created adds a luster all of its own. After all, a diamond isn't just perfection, it's rare perfection. Making it the perfect symbol for our logo and our aspirations. Over the years our diamond has earned its own reputation for a unique level of quality, the result of a fusion of commitment, innovation and experience. All of which become apparent when you look closely.

**Quality is Behind the Diamond.**

## They're not even close.

When it comes to restaurant fire suppression, our competitors can't come close to us, literally. For proof just examine the nozzle placement of our Zone Defense system. You might have to look carefully since our nozzles are tucked higher up in the hood than the competitor's design. There are also fewer of them. But don't think that means our systems are less capable. In fact, because our Zone Defense is inherently more effective, you can use fewer nozzles and place them higher, out of the way. Yet still meet all the industry safety standards.

## Do more with less.

Besides having fewer nozzles, our fire suppression systems use less Wet Chemical agent thanks to an overlapping spray design (an innovation we pioneered). We don't require you to route piping to an external source. With Amerex, the agent is in a nearby tank. Everything is self-contained for lower maintenance costs.

## Two choices. Same performance.

### Amerex KP Restaurant Fire Suppression System

Amerex offers two systems to meet the industry's varying needs. With the Amerex KP Restaurant Fire Suppression System you get appliance-specific coverage that typically offers lower initial cost. The KP system is ideal for uses where appliance location is fixed such as in fast food chains, casual dining, cruise ships and school cafeterias.

### Amerex ZD Restaurant Fire Suppression System

The Amerex ZD Restaurant Fire Suppression System adds greater flexibility by letting you reconfigure a kitchen or move appliances without moving nozzles. Because of its adaptability, this system is the most cost effective choice over the life of the system. The ZD system was designed with fine dining, culinary schools, military facilities, hotels and hospitals in mind.

■ DETECTION    ■ ACTUATION    ■ DISCHARGE

## Peace of mind is part of each system.

### All Amerex Restaurant Fire Suppression Systems offer:

- Less agent, fewer nozzles and higher nozzle height
- Around the clock protection with automatic detection
- Three detection options—fusible links, linear pneumatic and linear fusible link
- Wet Chemical agent with a low pH that's non-corrosive to stainless steel
- Pre-filled pressurized tank for reliability and ease of maintenance
- Listings with all major manufacturers of gas valves
- ANSI/UL300, ULC/ORD 125.6-1995, LPCB, CE marked, MEA and SOLAS listings

## A tradition of firsts.

When you choose Amerex you're taking advantage of a history of innovation. Among our restaurant industry firsts are the self-contained, overlapping protection of our Zone Defense and the use of linear pneumatic tubing for detection.

As the world leader in handheld fire extinguishers, we were uniquely qualified to create the first Wet Chemical fire extinguisher tested and approved for Class K listing by UL.

## The safest decision you'll ever make.

We know you've got a lot of choices. We also know fire suppression isn't something to take lightly. We never have and it shows in our innovation, quality and commitment to service. Amerex Corporation has been providing fire fighting products since 1971. We are the worldwide leader in hand portable and wheeled fire extinguishers. Our product line also includes vehicle fire suppression, gas detection, industrial systems and clean agent systems. And our products are made in the U.S.A.

Quality is Behind the Diamond.
