Vehicle Systems Cable Assemblies Part Number Changes: Power Leads and Communications Cables

 In order to simplify the ordering process, engineering efforts, and field recognition of cable assemblies, we are standardizing the part numbers of our power leads and communications cables. In addition, we now offer 20 and 30 ft. lengths of the power lead assembly. The table below shows the new part numbers for these cables. The cables will be the same in form, fit, and function; from a customer standpoint this is a label and part number change only. The changes will be made effective immediately. Please take the time to update your systems to reflect these changes. If you have any questions please contact the Amerex VFSS team.
