Quality is Behind the Diamond

HAND-PORTABLE FIRE EXTINGUISHERS

Product Catalog
PORTABLE FIRE EXTINGUISHERS FROM AMEREX

Amerex portable fire extinguishers have been the industry standard for 50 years. Since 1971, our commitment to quality, service, and innovation is unmatched. Quality is Behind the Diamond— in every product.

People never think twice about fire extinguishers until they need one, but when they need one the extinguisher must work. At Amerex, we all work together to make sure we’re delivering the best quality products available. From our quality audits at each level of production to shipping preparations before leaving the warehouse, you know the products you receive are what you have come to expect from Amerex. With warehouses located in Oakland, NJ, Elk Grove Village, IL, Santa Fe Springs, CA, and Trussville, AL, you are assured that product lead times are at a minimum.

WHERE TO USE

Amerex manufactures an extensive variety of hand-portable and wheeled fire extinguishers, both “compliance” (code required) and “specialty” types.

“Compliance” extinguishers are designed to meet and exceed state or local fire protection requirements. “Specialty” extinguishers are intended for use on particular types of hazards. Careful attention should be paid to locating them in close proximity to the specific hazard they are meant to protect. It is natural for a person to use the extinguisher located nearest to a fire. The most current issue of NFPA-10 should be consulted for minimum recommended fire extinguisher types, placement, and travel distances.

Your local Amerex Fire Equipment Distributor is professionally equipped to help you evaluate and implement these recommendations. All “Pictograms” are detailed below and should be reviewed with all who might be expected to use a fire extinguisher. Everyone should be familiar with these picture symbols which identify the types of fires on which they may be used. The international sign system diagonal red slash indicates a potential danger if the extinguisher is used on that particular type of fire.

All Amerex extinguishers are furnished with a detailed “Owners Manual” containing valuable information. The manual contains information on the installation, use, and maintenance of the extinguisher. The extinguisher nameplate contains specific information on “HOW TO USE” the particular extinguisher. The label instructions vary slightly according to type and size. All potential operators should be totally familiar with the instructions on any extinguisher they might be required to use.

All Amerex Fire Extinguishers comply with the recommendations of the National Fire Protection Association and are tested and rated by Underwriters Laboratories or FM Global to ANSI / UL Standards. All extinguisher nameplates contain the necessary HMIS information to comply with national and local OSHA requirements.

WATER

Model 240 utilizes the cooling, soaking, and penetrating effect of a 45-55 foot stream of WATER. The 55-second discharge time makes it very effective for inexperienced operators for use on Class A fires.

RUGGED
• 5-Year Manufacturer’s Warranty
• Stored Pressure Design
• Polished Stainless-Steel Cylinders
• All Stainless Steel Valve Construction
• Exclusive Crevice-Free, Butt Welded Cylinder
• Temperature Range +40°F to 120°F

USER FRIENDLY
• Maximum Visibility During Discharge
• Large Loop Stainless Steel Pull Pin
• QR Coded and Bilingual Labels

OPTION
• Model 506B Anti-Freeze Charge

The Model 240 may be freeze protected to -40°F by adding a Model 506B Charge.

Quality is Behind the Diamond
WET CHEMICAL extinguishers are the best restaurant kitchen appliance hand-portable fire extinguishers you can purchase. Each model utilizes a specially blended potassium acetate base agent and has been tested and approved by UL for restaurant kitchen hazards. The recent trend to more efficient cooking appliances and use of vegetable-based cooking oils dictates the use of a hand-portable fire extinguisher with greater fire-fighting capacity and cooling effect to combat these very hot and difficult fires. The Amerex Water Mist extinguishers contain de-ionized water (sold separately) making them the best extinguishers for protection of hospital environments, telecommunication facilities, and “clean room” manufacturing facilities. The Amerex Water Mist extinguishers are easy to use, maintain, and service.

WATER MIST is the ultimate extinguisher for Class A fires and for locations where a potential Class C (electrical) hazard exists. The fine spray from the unique misting nozzle provides safety from electrical shock, greatly enhances the cooling and soaking characteristics of the agent, and reduces scattering of burning materials. The Amerex Water Mist extinguishers contain de-ionized water (sold separately) making them the best extinguishers for protection of hospital environments, telecommunication facilities, and “clean room” manufacturing facilities. The Amerex Water Mist extinguishers are easy to use, maintain, and service.

Recommended for Lithium-Ion Battery Fires
**HALOTRON BRX™ (2-BTP)**

Halotron BRX™ (2-BTP) Amerex provides a unique solution for Halon 1211 replacement. The model 349 extinguisher utilizes Halotron BRX™ to fulfill the next generation of aviation extinguisher requirements. BRX is a low GWP and very low ODP clean agent approved for use on commercial aircraft. The Amerex model 349 is constructed of a lightweight aluminum valve assembly and cylinder. The hose provides the operator greater flexibility for utilization in tight spaces. Amerex is the solution for all of your portable extinguisher needs.

**RUGGED**
- 6-Year Manufacturer's Warranty
- Stored Pressure Design
- Aluminum Cylinder
- Durable High-Gloss Polyester Powder Paint
- All-Metal Valve Construction
- Hose is Unique to Amerex Product (Model 349)

**USER FRIENDLY**
- Maximum Visibility During Discharge
- Large Loop Pull Pin
- No Electrical Conductivity Back to the Operator
- No Thermal or Static Shock
- QR Coded and Bilingual Labels

**CLEAN**
- Leaves No Residue

Approved for Aircraft Only

Halotron™ I clean fire extinguishing agent discharges as a rapidly evaporating liquid, which is non-conductive, non-corrosive, and leaves behind no residue. Halotron™ I is the clean agent market leader with a history of successful real-world protection of valuable assets. From model-scale aircraft to wide-body commercial aircraft, from data centers to pharmaceutical and other industrial plants, the Halotron™ I agent has been used to extinguish the fire, limit damage, and help reduce downtime that can be caused by other agents.

Applications for these extinguishers include: data centers, laboratories, manufacturing plants, general office areas, computer rooms, telecommunication facilities, clean rooms, control rooms, warehouses, military electronics, vehicles including classic autos, boats, engine compartments, aircraft ramps, on-board aircraft, and in facilities that service aircraft and any facility where dry chemical extinguishers could cause unacceptable damage or contamination.

**RUGGED**
- 6-Year Manufacturer's Warranty

CARBON DIOXIDE

CARBON DIOXIDE is discharged as a white cloud of "snow" which smothers a fire by eliminating oxygen. It is effective for Class B flammable liquids and is electrically non-conductive. Carbon Dioxide is a clean, non-contaminating, odorless gas.

HALON 1211

HALON 1211 is a liquefied gas, pressurized with nitrogen, which discharges as a vapor causing no cold or static shock and no impairment of the operator’s vision. This “CLEAN” agent quickly penetrates difficult-to-see and hard-to-reach areas and leaves no residue. It is recommended for protection of delicate, sensitive, and expensive computers, electrical equipment, tapes and film, automotive and aircraft engines, laboratory chemicals and equipment.

RUGGED

CLASS D

The Amerex "soft flow" extension applicator is particularly suited for fighting Class D fires. It allows the operator to stand away from the extreme heat and toxic fumes caused by burning material. The easily controlled, even discharge provides a non-dispersing application of the agent. The extension applicator may be quickly detached to provide a straight stream of chemical where greater range is required.

RUGGED
- 6-Year Manufacturer's Warranty
- Sturdy Pressure Design
- Dependable Drawn-Steel Cylinders
- Special Corrosion-Resistant Yellow Paint
- Class D Color-Coated Paint Finish
- All-Metal Valve Construction

- Sodium or Potassium Spill: 5 ft.
- Magnesium Chips: 4 ft.
- Titanium, and powdered aluminum fires can be controlled and extinguished with this extinguisher. There is data showing that zirconium, uranium, and sodium-potassium alloys can be successfully extinguished with this extinguisher.

MODEL B424
- Magnesium Chips: 4 ft.
- Extinguishing Capacity: 2.5 lbs.
- DISCHARGE TIME (SEC.): 18
- RANGE (INITIAL- FT.): 15-21
- DEPTH (IN.): 6
- WIDTH (IN.): 10.5
- HEIGHT (IN.): 8
- SHIPMENT WT. (LBS.): 5.25
- CAPACITY (LBS.): 2.5
- UL & ULC RATING: 1A:10B:C

MODEL B456
- Magnesium Chips: 4 ft.
- Extinguishing Capacity: 2.5 lbs.
- DISCHARGE TIME (SEC.): 18
- RANGE (INITIAL- FT.): 15-21
- DEPTH (IN.): 6
- WIDTH (IN.): 10.5
- HEIGHT (IN.): 8
- SHIPMENT WT. (LBS.): 5.25
- CAPACITY (LBS.): 2.5
- UL & ULC RATING: 1A:10B:C

ABC DRY CHEMICAL
ABC or Multi-Purpose extinguishers utilize a specialty fluidized and siliconized mono ammonium phosphate dry powder chemical. It chemically insulates Class A fires by melting at approximately 530°F and coats surfaces to which it is applied. It smothers and breaks the chain reaction of Class B fires and will not conduct electricity back to the operator.

RUGGED
- 6-Year Manufacturer's Warranty
- Sturdy Pressure Design
- Dependable Drawn-Steel Cylinders
- Durable High-Gloss Polyester Powder Paint
- All-Metal Valve Construction
- Chrome-Plated Brass Valve Body
- Stainless Steel Handle & Lever
- Aluminum Valve-Heavy Duty
- Anodized Aluminum Valve Body
- Anodized Aluminum Handle & Lever
- Temperature Range -40°F to 120°F

USER FRIENDLY
- Easy and Economical to Maintain and Service
- Large Loop Pull Pin
- QR Coded and Bilingual Labels

MODEL 859 Dolly Cart provides for easy transport

For Combustible Metal Fires

For Combustible Metal Fires

Largest selection of size and extinguisher options available.
REGULAR DRY CHEMICAL

REGULAR extinguishers contain a siliconized sodium bicarbonate based dry chemical with free flowing and non-caking additives. Economical Class B & C protection with lower initial cost and recharging. This chemical smothers fires in flammable liquids and pressurized gases and will not conduct electricity back to the operator.

**RUGGED**
- 6-Year Manufacturer’s Warranty
- Stored Pressure Design
- Dependable Drawn-Steel Cylinders
- Durable High-Gloss Polyester Powder Paint
- All-Metal Valve Construction
- Chrome-Plated Brass Valve Body
- Stainless Steel Handle & Lever
- Large Loop Pull Pin
- QR Coded and Bilingual Labels
- Temperature Range: -65°F to 120°F

**USER FRIENDLY**
- Easy and Economical to Maintain and Service
- Large Loop Pull Pin
- QR Coded and Bilingual Labels
- Temperature Range: -65°F to 120°F

**OPTION**
- USC-G Approved with Bracket Listed on UL Label
- Chrome Cylinders (See Chart Below)

MANUFACTURED AND TESTED
TO ANSI/UL STANDARDS

CONFORMS TO TEST STANDARDS:
- CAN/ULC-S504 - ANSI/UL299 & CAN/ULC-S508 - ANSI/UL711
- MANUFACTURED AND TESTED TO ANSI/UL STANDARDS
- COMPLIES WITH NFPA 10 STANDARD
- ISO-9001 and ISO-14001 CERTIFIED
- UL LISTED

PURPLE K DRY CHEMICAL

PURPLE K extinguishers contain specially fluidized and siliconized potassium bicarbonate dry chemical which is particularly effective on Class B flammable liquids and pressurized gases. It is electrically non-conductive. Purple K has been the choice of oil, gas, chemical and utilities industries as the preferred fire-fighting agent.

**RUGGED**
- 6-Year Manufacturer’s Warranty
- Stored Pressure Design
- Dependable Drawn-Steel Cylinders
- Durable High-Gloss Polyester Powder Paint
- All-Metal Valve Construction
- Chrome-Plated Brass Valve Body
- Stainless Steel Handle & Lever
- Large Loop Pull Pin
- QR Coded and Bilingual Labels
- Temperature Range: -65°F to 120°F

**USER FRIENDLY**
- Easy and Economical to Maintain and Service
- Large Loop Pull Pin
- QR Coded and Bilingual Labels
- Temperature Range: -65°F to 120°F

**OPTION**
- USC-G Approved with Bracket Listed on UL Label
- Chrome Cylinders (See Chart Below)

MANUFACTURED AND TESTED
TO ANSI/UL STANDARDS

Z-SERIES HIGH PERFORMANCE

Z-Series extinguishers are the ultimate choice in fire extinguishers for high hazard, frequent use, and extreme environment applications. Economical—less initial cost, lower maintenance costs, and greater reliability than cartridge-operated extinguishers. Amerex Z-Series extinguishers are available with a proprietary, zinc-enriched coating that resists corrosion for up to 12 years in severely salt-contaminated environments.

**RUGGED**
- 12-Year Manufacturer’s Warranty
- Zinc-Enriched Coating
- All-Metal Valve Construction
- Gauge Guards are Chrome-Plated Brass
- Protective Rubber Foot Rings
- Superior Range (Vertical & Horizontal)
- High (240 PSI) Operating Pressure
- Temperature Range -65°F to 120°F

**AGENTS**
- ABC Multi Purpose, Purple K

**OPTION**
- USCG Approved with Bracket Listed on UL Label
- Hot dip galvanized USCG brackets on UL Label

**USER FRIENDLY**
- Wide Grip Allows Clearance for Gloved Hand
- Large Loop Stainless-Steel Pull Pin
- QR Coded and Bilingual Labels

**COMPLIANCE FLOW**
- Long Range
- Highest UL Ratings

**FAST FLOW**
- High Flow Rate
- Fast Discharge
- Quicker Knockdown
- More Operation Protection

**HIGH FLOW DRY CHEMICAL**

High flow portable fire extinguishers for applications where discharge rates exceeding one pound per second are required as specified in NFPA 10. These extinguishers utilize the same hardware and are manufactured to the same UL specifications as Amerex compliance-rated products.

**RUGGED**
- 6-Year Manufacturer’s Warranty
- Stored Pressure Design
- Dependable Drawn-Steel Cylinders
- Durable High-Pressure Polymer Powder Tanks
- All-Metal Valve Construction
- Brass Valve Heavy Duty
- Chrome-Plated Brass Valve Body
- Stainless Steel Handle & Lever
- Twice the Flow Rate of Standard Models
- Meets DOT Requirements
- Temperature Range -65°F to 120°F
